Population estimates are used by the public sector, private sector and the general public. The Yukon Bureau of Statistics produces population estimates twice a year. Figures for the months of January to June are released in July of the same year while population estimates for the months of July to December are released in January of the next year.

These population estimates are statistically based on the Yukon Health Care Registration file. The figures are sorted by postal codes and community codes. Users of this information should be aware that the community population includes not only the legally defined city limits, but also the population that lives in the immediately surrounding area.
